WATER RESOURCES BULLETIN 2-16  
WATER WELL RECORDS FOR ONTARIO  
REGIONAL MUNICIPALITY OF OTTAWA-CARLETON  
1946-1972

---

INTRODUCTION

This publication is one of a series which presents water-well information for the Province of Ontario. This bulletin contains water-well data for the Regional Municipality of Ottawa-Carleton for wells constructed during the period 1946 to 1972. Table 3 lists previous reports in which similar data have been published.

The information in this bulletin has originated from water-well records completed by water-well drilling and boring contractors licensed in Ontario. The production of this publication was carried out through the use of computer storage and printout facilities. The codes and abbreviations used in the main text are explained in the section entitled, "Explanation of Column Headings".

The geographical area covered by this bulletin is shown on the map on page iv. A summary of the water-well statistics for the Ottawa-Carleton area is displayed in Table 1.

Enquiries

The original water-well records published in this bulletin are available for public reference at the office of the Southeastern Region, Ministry of the Environment at:

133 Dalton Street  
Kingston, Ontario  
Tel: 613-549-4000

Enquiries about this and previous publications should be addressed to:

The Supervisor  
Hydrology and Monitoring Section  
Water Resources Branch  
Ministry of the Environment  
135 St. Clair Avenue West  
Toronto, Ontario  
M4V 1P5

## Acknowledgements

The Ministry of the Environment gratefully acknowledges the assistance and service rendered by the water-well drilling and boring contractors who submitted the water-well records. This information provides a basic and unique tool in the assessment of ground-water conditions throughout Ontario.

This bulletin was prepared by staff of the Water Resources Branch who were ably assisted by the staff of the Administrative Services Branch and Technical Services Branch.

## WATER WELL RECORDS

Each time a licensed water-well contractor constructs a well, a record of the well is submitted to the Ministry of the Environment. The record is then field-checked for reasonable accuracy by a Water-Well Inspector who works from one of the Ministry's Regional Offices. Subsequently, the information is entered on computer file in Head Office and the original record is filed at the respective Regional Office of this Ministry.

A selection of the important information from each record has been compiled in this bulletin. All data concerning the location, owner's name, date of construction, geological log, water levels, well yields and water use are included. Additional information concerning casing length, screen, drilling method and well plugging are not included in this publication, but are available for any particular record upon request from the Regional Office.

## LICENSED DRILLING AND BORING CONTRACTORS

Table 2, page 548, lists the names and addresses of the licensed drilling and boring contractors who constructed the wells listed in this bulletin. The table also lists the number of wells drilled within the Regional Municipality of Ottawa-Carleton each year from 1965 to 1972. Please note that the contractors listed may also have constructed wells in other areas during this period.

## EXPLANATION OF COLUMN HEADINGS

**MUNICIPALITY** The municipal names used in this bulletin are based on the township system. Urbanized areas which have undergone municipal name changes are indicated with the old names appearing in brackets after the current names, e.g., Ottawa City (Nepean) means that wells listed under this heading are in an area which is now in the City of Ottawa, but which was formerly in the Township of Nepean. In such cases the survey descriptions given are for the former municipality, i.e., the Township of Nepean.

**CONCESSION** The majority of townships in Ontario are surveyed into a regular pattern of concessions and lots; however, in some areas, geographical or historical factors may have created surveys of irregular shapes or patterns. This has resulted in many survey descriptions which are unique to certain areas. The abbreviations used in this bulletin to describe such surveys and tracts are listed below.

<u>Abbreviations</u>	<u>Survey or Land Area</u>	<u>Municipality</u>
BF	Broken Front	Gloucester, North Gower Marlborough, Osgoode
COM E	Eastern Common	Cumberland
COM M	Middle Common	Cumberland
COM W	Western Common	Cumberland
JG	Junction Gore	Ottawa City (Gloucester)
LI	Long Island	Gloucester, Osgoode
NI	Nicholls Island	Nepean
OF	Ottawa River Front	Cumberland, Gloucester, Nepean, Ottawa City (Gloucester), Ottawa City (Nepean)
RF	Rideau River Front	Gloucester, Nepean, Ottawa City (Gloucester), Ottawa City (Nepean)

WELL NO.	(Well Number) This is a unique number identifying each well within the province.
UTM EASTING NORTHING	<p>(Universal Transverse Mercator Co-ordinates in Metres) This location system makes use of a square grid, 1,000 metres x 1,000 metres, which is superimposed on maps of the National Topographic System. The vertical grid lines are called Eastings and the horizontal lines Northings.</p> <p>The Easting represents the distance of a well in an easterly direction from a given north-south reference line. The Easting is the upper figure in the column.</p> <p>The Northing represents the distance of a well in a northerly direction from a given east-west reference line. The Northing is the lower figure in the column.</p> <p>The Eastings and Northings allow the plotting of wells on the National Topographic maps directly from the bulletin. Each map contains an explanation of the use of the co-ordinate system.</p> <p>The UTM co-ordinates were calculated after the well locations were plotted on topographic maps, using the locational diagrams submitted by the drillers. If the location of a well is uncertain, then the UTM co-ordinate spaces are filled completely with 9's.</p>
ELEV FEET	(Elevation in Feet) This represents the ground elevation at the well site in feet above mean sea level. The elevations were determined from plotted locations on the National Topographic maps and are therefore related to the accuracy of the locations and the scale of the maps.
DATE	The month and year of well completion are shown in this column.
DRILLER	The drilling firm's license number is given for each well. Table 2, page 548, is a numerical listing of the license numbers with the corresponding contractors' names and addresses.
CSG DIA INS	(Casing Diameter in Inches) Casing diameters are shown to the nearest inch. Where several sizes of casings are used, the diameter of the upper casing only is given.

KIND OF WATER	<p>After the construction of each well, the driller evaluates the water quality with a taste and smell test. The kind of water is shown by the following abbreviations:</p> <table> <tr> <td>FR</td><td>Fresh</td></tr> <tr> <td>SA</td><td>Salty</td></tr> <tr> <td>SU</td><td>Sulphur</td></tr> <tr> <td>MN</td><td>Mineral</td></tr> </table>	FR	Fresh	SA	Salty	SU	Sulphur	MN	Mineral
FR	Fresh								
SA	Salty								
SU	Sulphur								
MN	Mineral								
WATER FOUND FEET	This is the distance or distances in feet below ground level at which the driller reported the occurrence(s) of water.								
STAT LVL FEET	(Static Level in Feet) This is the distance below ground level to the water surface when the well is not being pumped. Static levels above ground are not given; the notation FLW, meaning a flowing well, is given for this condition.								
PUMP LVL FEET	(Pumping Level in Feet) This is the distance in feet below ground level to the water surface at the end of pumping test or the start of a recovery test.								
TEST RATE GPM	<p>(Pumping Test Rate in Imperial Gallons per Minute)</p> <p>This is the rate at which the well was test-pumped. In some cases the stated rate is a recovery rate, or the flow rate of a flowing well. The reported pumping-test rates are usually the results of short-term pumping tests. They do not necessarily represent the rates at which the wells could continue to supply water for prolonged periods of pumping. Continuous pumping at the stated rates could have resulted in some of the wells being pumped dry, while others may have been capable of being pumped steadily at much higher rates than those reported during the pumping tests.</p>								
TEST TIME HR/MIN	(Test Time in Hours and Minutes) This is the length of time during which the pumping or recovery test was conducted. Test times of 100 hours or greater are shown as 99 hours 59 minutes.								

WATER  
USE

The following abbreviations are used to describe water use:

Domestic	DO
Stock	ST
Public Supply	PS
Commercial	CO
Industrial	IN
Irrigation	IR
Municipal	MU
Cooling or Air Conditioning	CA

In the classification of water use, domestic (DO) includes supplies for private household use; (ST) includes supplies for watering and washing livestock; public supply (PS) includes supplies for camping grounds, hospitals, churches, schools and public washrooms; commercial (CO) includes supplies for garages, stores, restaurants, motels, drive-in theatres and fish hatcheries; industrial (IN) includes supplies for factories and dairies; irrigation (IR) includes supplies for greenhouses, golf courses, market gardens and other crops; and municipal (MU) includes wells developed for municipal water systems serving five or more residences.

OWNER/LOG

The name of the original owner of the well is given on the top line. The following lines show the materials and colours for each geological formation encountered and are described by standard abbreviations. They are listed in predominant order, i.e., the most common material first and other materials after. General colour qualifications are given where pertinent. The following examples illustrate the principle:

msnd grvl	- sand and gravel
grey clay fsnd grvl	- grey clay and fine sand and gravel
brwn grvl csnd	- brown gravel and coarse sand

Some of the actual terms employed by the drillers have been altered to conform to the standard list of materials. The standard lists of materials and colours with the corresponding abbreviations are shown below:

### Material Abbreviations

Unknown	UNKN
Fill	FILL
Topsoil	TPSL
Muck	MUCK
Peat	PEAT
Clay	CLAY
Silt	SILT
Quicksand	QSND
Sand or Medium Sand	MSND
Fine Sand	FSND
Coarse Sand	CSND
Gravel	GRVL
Stones	STNS
Boulders	BLDR
Hardpan	HPAN
Limestone	LMSN
Dolomite	DLMT
Shale	SHLE
Sandstone	SNDS
Slate	SLTE
Quartzite or Quartz	QRTZ
Granite	GRNT
Greenstone	GRSN
Previously Dug or Bored	PRDG
Previously Drilled	PRDR
Overburden	OBDN
Rock	ROCK

### Colour Abbreviations

White	WHIT
Grey	GREY
Blue	BLUE
Green	GRN
Yellow	YLLW
Brown	BRWN
Red	RED
Black	BLCK

DEPTHS IN  
FEET TO WHICH  
FORMATIONS  
EXTEND

Each formation is followed by a number which indicates the distance to the bottom of the formation. The last number generally indicates the total depth of the well.
